

Kayvaun Khoshkhou (ID: 920 357 344)

Due: 11/6/2020

Assignment 4 – Preparation

Meeting Summaries

Meeting 1 – 10/28/2020

Focus was on:

- Package 10 and Diagram
- Discussed Public vs Private
- Usage of Template
- Difference between array and linked bag

Personally, I found this meeting to be useful to get things sorted out and organized and to get a small intro on assignment 4's purpose and approach. I asked a majority of the questions revolving around public vs private as well as on array bag, as we reviewed package 10, and created a lot of discussion because of this.

Meeting 2 – 11/03/2020

Focus was on:

- Package 11
- Questions focused on recursion
- Tail Recursion
- Indirect Recursion
- Package 13 Smart Pointers

Peter explained these packages and acted sort of as the meeting leader, and it went well. We learned a lot from this meeting.

Meeting 3 – 11/04/2020

Focus was on:

- Package 13
- Implementation of smart pointers
- Friend class
- Friend function
- Cyclic reference

Thao made a good effort towards asking questions and when no one could answer, she figured it out and helped explain it to us all. Keon also did this with implementation of smart pointers and Peter went over friend class and functions.

Evaluation

Team Dat Dot			
#	Team Member's Name	Evaluation (?/20)	Comments on performance
1	Keon Abbasi	20	Good research and effort on helping
2	Thao Ho	20	Supportive and helpful
3	Peter Truong	20	Great Leadership, took charge well
4	Edreece Afridi	20	To the point, Focused
5	Kayvaun Khoshkhou	20	Asked a lot of good questions
