

Kayvaun Khoshkhou

CSC 211 – 03

The screenshot displays an IDE window for a project named 'Csc211Lab01'. The main editor shows the file 'MyFirstLab.java' with the following code:

```
1 public class MyFirstLab {
2     public static void main(String[] args) {
3         System.out.println("Hello World!");
4         System.out.println("My name is Kayvaun.");
5         // the following is my statement in a full sentence with no breakage
6         System.out.print("I am a ");
7         System.out.print("student at ");
8         System.out.println("SFSU.");
9         // the following is my statement with breaks in it to show how I used println
10        System.out.println();
11        System.out.println("I am a ");
12        System.out.println("student at ");
13        System.out.println("SFSU.");
14    }
15 }
16
```

Below the code editor, the 'Run' tab is active, showing the execution of 'MyFirstLab'. The output is as follows:

```
"C:\Program Files\Java\jdk1.8.0_131\bin\java.exe" ...
Hello World!
My name is Kayvaun.
I am a student at SFSU.

I am a
student at
SFSU.

Process finished with exit code 0
```

The bottom status bar indicates 'Build completed successfully in 1 s 254 ms (2 minutes ago)'.
